The Nirvana Club
The International Trading Club Exclusively for OmniTrader Users

The Accuracy of ARM4
AND the Power of OmniVest
AMAZING RESULTS

NOW! IS THE TIME TO JOIN

The ULTIMATE Trading Machine
Nirvana’s Fully-Automated Trading Mission
I have always believed it was possible to build computer algorithms powerful enough to consistently make money trading the markets.

The Nirvana Club was established as a partnership with a select group of customers to generate new trading technology, with the end goal of creating the Ultimate Trading Machine.

Club Memberships have made it possible for us to dedicate significant resources towards the development of our Premier Artificial Intelligence trading technology known as ARM4.

The Accuracy of ARM4 Strategies

We now have several ARM4 Strategies that are approaching 80% accuracy while producing consistently profitable equity curves.

A cornerstone of this technology is our fully mechanical trading systems like NSP-41 and VBX-3, but the real story is how ARM4 improves these great strategies, in some cases as much as doubling their performance. And there’s more to come. The technology is improving every year, and the Nirvana Club continues to reap the benefits.

The Investment Power of OmniVest

ARM4 Strategies enable Club Members to consistently beat the markets. And this year, with the introduction of OmniVest, Nirvana Club Members are enjoying the benefits of fully automated trading with the best signals ARM4 has to offer.

OmniVest is based on the Portfolio of Strategies concept. By combining trades from multiple ARM4 Strategies, OmniVest keeps an account more fully invested and more diversified, resulting in impressive returns. Read about this breakthrough technology on pages 8-9!

Amazing Results

Nirvana Club Members are currently using OmniVest with ARM4 Strategies and seeing remarkable results. We’ve included a few of their stories on page 10. We are continually increasing the number of ARM4 strategies available, so the performance will only get better.

For a limited time, we are including a Lifetime subscription to OmniVest for those who join the Nirvana Club during this promotion.

The Opportunity of a Lifetime

This newsletter will inform you about the technology that is propelling us into a new era of profitable automated trading. It will also give you a special insight into the Nirvana Club, an organization of like-minded Omni Traders who understand and support our mission.

If you are looking for advanced trading technology that can help you consistently win in the markets, the Nirvana Club is for you. And we’re talking about technology that is simply not available to individual investors, anywhere else, at any price. Discover why so many members feel a Club Membership is the best investment they have ever made.

Sincerely,

Ed Downs
CEO & Founder
Nirvana Systems, Inc.
What is ARM4?

The Nirvana Club has been working on Artificial Intelligence for over 17 years. In this time, we have built some very powerful tools for identifying the best Signals from any Strategy.

We call the collection of tools ARM4. The term ARM stands for Adaptive Reasoning Model. The concept, which has now been proven over years of trading, says that securities have personalities and that these personalities change over time.

Using Artificial Intelligence, we gain a tremendous advantage because we can let a Neural Network or Consensus Engine determine which Signals have the highest probability of winning, based on Measurements taken in the charts (see pages 4-5). This process works extremely well; results from one of our ARM4 Strategies is shown to the right.

ARM4 is an open tool. Club Members all over the world are enhancing their own Strategies by applying ARM4 to them. As a Nirvana Club Member, you will have full access to this powerful technology and the savvy community of traders who are using it to win in the markets.

Reaching the Next Level

This is the dawn of a new age in profitable Strategy development. Over the past few months, we have been focused on creating more winning Strategies powered by ARM4. We just released 5 New Strategies that we are using in OmniVest. This is the perfect time to join The Nirvana Club, especially when you consider the value of a lifetime subscription to OmniVest that comes with your Membership! Read about OmniVest on page 8.
As a Nirvana Club Member, you gain access to ARM4—the greatest Artificial Intelligence Engine ever created for Traders.

ARM4 is really three different technologies that have been developed for The Nirvana Club: Neural Networks, Genetic Algorithms, and the Consensus Block. But all of them work essentially the same way.

As shown in the diagram to the right, Trading Systems are run against a large number of charts, over a long period of time. While this is being done, indicator measurements are also taken where the Signals fire, such as the value of RSI or Stochastics. We also measure relationships, such as percent change in volume—anything that might yield a clue as to whether the Signal is likely to be profitable.

Then, one of our ARM4 technologies is used to analyse this data to discover situations in the market that identify the most profitable Signals.

A Neural Network is used when we want to focus on Indicator-Signals relationships, a Genetic Algorithm is used to find rules between Signals and Conditions (such as “Above Moving Average”), and a Consensus Block is used to find pure relationships between two or more Indicators.

We provide canned Strategies, like the one shown here, with the components already trained. All you do is activate them and generate Signals. But you CAN also easily create your own using our simple ARM4 interfaces.
Included: VBX-3 with ARM4

We recently applied both the ARM4 Consensus Block and Neural Network to our latest Premier Strategy, VBX-3. This brand new System finds razor-sharp reversals in practically any market. When powered by ARM4 it’s even more profitable.

On this page are some of the Signals from VBX-3 with ARM4 applied to the Signals. Once again, ARM4 demonstrates the uncanny ability to identify the best possible Signals. Here is a comparison of Profit per Trade numbers:

<table>
<thead>
<tr>
<th>Profit per Trade</th>
<th>Longs</th>
<th>Shorts</th>
</tr>
</thead>
<tbody>
<tr>
<td>VBX-3 (standard)</td>
<td>0.75%</td>
<td>0.39%</td>
</tr>
<tr>
<td>VBX-3 with ARM4</td>
<td>1.75%</td>
<td>1.00%</td>
</tr>
</tbody>
</table>

That’s right—ARM4 more than doubled profit per trade of the new Strategy! VBX-3 and the ARM version of VBX-3 are included with your Nirvana Club Membership—a $1,495 value.

Also Included: NSP-41 with ARM4

When you join The Club, you also get NSP-41, a $3,000 value! To the right is an equity curve generated by taking all Signals generated by NSP-41 on stocks in the S&P 100 index.

This time-tested Strategy has shown the ability to generate an average 24% annual profit in live trading and over many years of testing. Even higher returns can be achieved by using NSP-41 in a Portfolio of Strategies in OmniVest. See pages 8-9 for details.
In hindsight, I waited too long before joining The Nirvana Club. As a trader, this has been without any doubt my best trade investment. The friendships, knowledge gained, and sense of belonging have been worth every cent. Do not make my mistake—take the step. You will not regret it. — Ric Richardson

Here’s all you get with your Membership…

The Most Accurate Strategies On the Planet

Our ARM-powered Strategies are second to none in the world of Trading Software. When you join the Club, you get all the ARM Strategies ready to run in your OmniTrader or VisualTrader software.

You ALSO gain access to Signals from these Strategies in OmniVest, so you can enjoy the benefits of running Portfolios of ARM Strategies like other Nirvana Club Members are doing right now!

Advanced Trading System Technology

Our canned ARM4 Strategies are ready to be used in trading by all Members. But those who are familiar with Technical Analysis principles will be thrilled with the ease and convenience of our ARM4 strategy-building technology.

For those who want to create their own A.I. Components that plug-into your Strategies you get all the tools you need. Our ARM technology is integrated into Strategy Builder, making it easy to create powerful A.I. Components including ARM4-powered Systems, Filters, Confirmers, and Exits.

Priority Technical Support

Nirvana Club Members receive preferred status and special privileges. Members receive toll-free access to our Support department, and they receive priority in the support queue. Just say, “I’m a Nirvana Club Member”.

Member Discounts:

Software, including VisualTrader and Plug-ins.............................................SAVE 50%

Educational Seminars.............................................SAVE 40%

Subscription Services, including Real Time Data.......................SAVE 30%

Club Members enjoy generous discounts on all Nirvana products, including software, seminars, and subscriptions.
The Club Community

The Nirvana Club is a close-knit community that is constantly sharing ideas and information. One way they do this is through The Nirvana Club Forum, where thousands and thousands of posts and conversations have occurred over the years. We also host an annual FREE event—just for Members we call The BASH. To the right are a few photos from this enlightening event.

Free ARM Education

We host special educational courses FREE for Nirvana Club Members—in our Omni Trader University. Learn how to use the base ARM4 Strategies in your trading and how to use ARM4 to create custom Strategies. Our classes provide the additional benefit of being an open forum, so you can connect with other Members who share the same interests through the University.

“The OTU course on ARM4 was fabulous.” — Club Member

NEW! in 2013: OmniVest Access

As described in our story Search for The Ultimate Trading Machine, all of this technology has finally come together in one delivery vehicle that Members are now taking advantage of—and profiting from. Club Members in OmniVest have access to ARM Strategies that we have uploaded—just for their use. Many have already been steadily making gains using this incredible resource. For limited time, we are including a lifetime subscription to OmniVest for those who join The Nirvana Club during this promotion.

“The A.I. tools are as powerful as anything the hedge fund managers have. But, what makes the Club really powerful is the interaction with other Members.” — Steven Mayo

“Visiting Club Members and staff at each year’s BASH is a definite can’t miss event!” — Jerry Wakeen
The Search for the Ultimate Trading Machine

I started Nirvana Systems in 1987 to create the Ultimate Trading Machine (UTM)—a trading system that is over 80% accurate and where the ratio of Average Profit to Average Loss is 3-to-1.

The Nirvana Club was created in 1996 to pursue this goal through the use of Artificial Intelligence technology, and we have moved the ball closer every year.

I am quite proud of what we have accomplished in The Nirvana Club so far. ARM4 works. This proprietary technology is the result of millions of dollars of investment and years of research in The Nirvana Club. Most Members use our canned ARM4 Strategies, but many are applying it to their own technical analysis concepts and reaping the benefits.

We Have Accuracy and Profitability—Now it’s Time to Build Wealth

Question: When you have Strategies that are as accurate as those in The Nirvana Club, how do you leverage them to grow an account? The answer might seem obvious—trade them! But if you look back at the results on page 3, you notice that this very accurate Strategy doesn’t trade often, because it is using ARM4 to select only the most profitable trades.

Even though the Strategy has been 95% accurate, by itself it only grew the account by 4% over 7 months. But when we combine several of these Strategies into a portfolio, we can reap huge rewards... and that’s exactly what OmniVest does for Nirvana Club Members.
Club Members are Excited

OmniVest is based on the Portfolios of Strategies concept. The concept is simple—that a repository of available trades can be used to keep an account invested. By combining ARM4 Strategies into one trade stream, we can stay more fully invested which in turn leads to higher actual returns in an account.

On the previous page, we see Equity Curves from 3 ARM4 Strategies. They are superb. But again, they don’t generate that many trades. By aggregating the Strategies, we end up with the Equity Curve shown below them—generating a return of 51% per year and growing an account from $100,000 to nearly $800,000 in just 5 years. That’s phenomenal!

“I’m having a lot of success with OmniVest so far. Since January 15 (6 weeks) I’m up almost 7% in my cash account—an annualized rate of 71%. So, I’m really happy with it.” – Cal Hunziker

ARM4 Strategies provide a supply of profitable trades. By combining them together, the account is more fully invested, which is how it is able to make these gains.

We have been steadily uploading ARM4 Strategies into OmniVest since it was launched, and will continue to do so. By applying ARM4 to our repository of Trading Strategies we expect to build a world class collection of A.I. Strategies that consistently win, day in and day out, growing an account in the process.

Nirvana Club Members can trade the ARM4 Strategies in their OmniTrader and/or VisualTrader. Another choice many people are making is to let OmniVest’s Trade Processor automatically manage their trades. Read some of their stories on the next page.

I am thrilled that we are now exceeding the goal I set out to accomplish 17 years ago.

OmniVest is Easy to Use

1. Select Your Strategies
2. Get Trades from Site or automate trading with the Trade Processor.

FOR A LIMITED TIME
A Complimentary OmniVest Subscription Included FREE to New Members

This year, we are offering something extraordinary for new Members—a lifetime subscription to OmniVest! Even if you don’t use this benefit today, it’s going to be there for you as we continue to build out the Strategy repository. You will look back one day and be VERY glad you made this investment in a Nirvana Club Membership.
Recent Feedback on OmniVest:

“I started my OmniVest account with $50,000, which I manually traded in November and made $3,000. Then, I started running the Trade Processor on it in fully automated trading in December. The account is up 18%+ in just 4 months—an annual rate of return of something like 54% per year.”

– Larrie Cable

“I really like the ability to fine tune the selection of Strategies that I wanted to trade before I actually started using real money. The tools that help pick the Strategies that work best for me were really easy to use. It didn’t really take a lot of time to put together a good set of Strategies. My account is already up about $6000 in 4 weeks; if I extrapolated that out it would be something like a 53% gain in a year.”

– Mike Sanders

“I really like how you handle the weighting of Strategies so I can build Portfolios that are 100% invested. It allows me to increase the total returns much better than what I was able to do when I used The Machine.”

– OmniVest Forum

I am very happy with the OmniVest and Trade Processor system. I started trading with real $ on Jan 15th 2013 and 12 weeks later I am up 9.8%. At that rate, I should experience better than 42% profit by the end of the year. I am very pleased.

– Bob Vogler

“I’m up about 12% over the past 3 months using OmniVest. I’m also a Registered Investment Advisor and have access to the best money managers in the world for my personal accounts. They do OK, but none of them have done 12% in the past 3 months. I think the future is very bright for OmniVest and could not be happier with the direction Ed is taking OmniVest and the Trade Processor and what that means for Nirvana Club Members.”

– L.D. Newby

“I have been a Member of the Club for 4 years and I sure am glad I joined. Club Members are always ready to help each other and as a Member, you have the opportunity to participate in the success and development of Nirvana products. You will be rewarded over and over again by the success of the Club Strategies. The money you will make will quickly cover the cost of joining. Join today and find out what you are missing.”

– Ken Holmes

“I’ve been in The Nirvana Club since its inception over 13 years ago. It’s been a fun, exciting and fulfilling experience. Fun because of meeting and exchanging ideas with other Club Members. Exciting because of receiving new Nirvana products at discounted prices and discovering all the new features Nirvana is developing. And fulfilling because I am using the software to make money in the markets.”

– David Olson

“As a Member of the Club for a number of years, I have used the forum to interact with other Members about trading ideas, and have found the Bash’s hands-on training to be invaluable. However, the single most valuable benefit of being a Club Member is the ARM technology. Everybody would love to have tomorrow’s newspaper today or a crystal ball, but this isn’t a reality. Since I don’t have access to that, I have the next best thing—ARM. It is the most powerful trading tool I have found. Keep up the great work.”

– Heagan Bayles, Jr.

“The Club has provided a place for myself and my peers to communicate and has opened up a whole world of sharing and camaraderie. Because of my many years in the Club, my trading knowledge and success has increased exponentially and I enjoy sharing my knowledge with other Members.”

– Jerome Sigalow
Now is the Time!

Incredible Benefits offered this year – will not be repeated!

Are You Ready to Build Real Wealth?

If so, you need to take a hard look at The Nirvana Club. We have many customers who are using OmniTrader and VisualTrader with our ARM4 technology to win in the markets. And all new Members receive the same benefit. However, starting this year, we are seeing the excitement build around OmniVest.

As we continue to work towards The Ultimate Trading Machine, in terms of Strategy performance, Members are presently seeing outstanding returns from their OmniVest Strategies. And this is just the beginning. We are adding more ARM Strategies all the time. It’s a very bright future.

But the Club isn’t just Strategies. It’s a community of like-minded traders and investors who believe that the way to get consistent gains in the markets is to use Strategies that have an edge. The Nirvana Club Forums are VERY active as people share Neural Networks and other discoveries. And many, many friendships have been created through the interactions in The Club.

And THIS YEAR, we are doing something extraordinary—we are offering a LIFETIME subscription to OmniVest for new Members. Join The Club, get OmniVest and start building wealth with us! This is truly the opportunity of a lifetime.

Sincerely,

Ed Downs
