OmniTrader 2018

Automatic Trade Selection

Dramatically Improves ALL Strategies

NEW in OmniTrader - ATS

Only Take the BEST Trades

ATS gives you the best trades every day.

Trade Better with Ease

Test the effect of ATS and trade it automatically or manually.

Improve the Performance of ANY Strategy

Apply ATS to your strategy for superior results.

Introducing:
iZones

Consistently Find the Supply and Demand Zones Where Money is Made

Discover the Power

of Automatic Trade Selection in your trading!

Every year, we review OmniTrader to determine what we can add to it to help our users make more money in their trading. In 20 years of upgrades, we've added a lot of great features.

This year we stepped back to ask an important question. OmniTrader can find a great list of Signals each day (or each bar, in Real Time). But we typically have more Signals than we can trade. So which ones do we trade?

We might have 3 or 4 new Long Signals on a given day. Before we submit orders, shouldn't we be selecting the BEST ONES? What we want to do is RANK the Signals based on a metric that indicates better trades. This is precisely what Automatic Trade Selection or "ATS" in OmniTrader 2018 provides.

Selecting the Best Trades - Automatically

The OmniTrader Focus List has the ability to sort Signals using a metric like volatility or strength of trend. But ATS has the ability to actually TEST a ranking method to see if it works, and how well it works!

And ATS goes beyond a single indicator. It can automatically test & combine SEVERAL RANKING INDICATORS using a proprietary optimization algorithm. Just run the Portfolio Simulator and ATS does the work.

With ATS, you don't have to know which indicators to use. ATS does IT ALL..

Long vs. Short Allocation

There is an additional dimension we can use to reduce risk which is the mixture of Longs vs. Shorts. This balance is one of the ATS settings.

ATS is a huge feature in OmniTrader 2018 that enables us to automatically find the best Ranking method for all Profiles and Strategies. Rank the Signals in the Focus List or use the same ranking in AutoTrade.

One more thing – there's nothing to learn. While you certainly can experiment with your own ranking ideas, you don't have to because we include several ATS methods with the upgrade. See them in action on pages 4-5.

And, there's more... OmniTrader 2018 has a number of additional improvements customers have asked for, like OmniScript columns, indicator alerts, and more.

Included in the Package A New Way to See Supply & Demand

Our plug-in for this upgrade is an amazing invention called iZones. This easy-to-use tool makes it VERY easy to see where Supply and Demand Zones are forming in any market, making it the perfect confirming tool for Breakouts, Reversals, or to confirm new Trend levels.

If you look at the charts on page 6-8, you will see how well this new indicator illuminates these zones. And, we've included a collection of Strategies that generate iZone Signals.

A GREAT UPGRADE!

ATS is so powerful, we considered making it a separate module. But it provides such a great benefit, I felt it really should be included in the upgrade. We've also dramatically discounted iZones in the special package.

I honestly think we knocked the ball out of the park on this one. As always, your purchase is 100% guaranteed, but you're going to like this upgrade. It's awesome.

Sincerely,

Ed Downs
CEO and Founder

Automatic Trade Selection

Not All Trades Are Created Equal!

On any given day, or any bar in real time, we typically will see a number of Signals on the same day (bar). Which ones do we take? Even more importantly, if we are running trading automation using Auto Trade, which ones does it take?

Ranking Makes All the Difference in the World

The new ATS feature in OmniTrader 2018 is designed to answer the question, "Which trades do I take today?" But it does it in a very special way that you will read about on the following pages.

Automatically Combines Multiple Indicators

An enormous advancement in the design of ATS is that it can rank on multiple indicators. It does this by running simulations on your symbols and signals to determine which ranking formulas help select better trades. Then, it sets the weights automatically.

“ATS is a breakthrough feature that has the potential to improve the results of ANY Profile in OmniTrader.”

A Huge Performance Booster!

A Portfolio Simulation on the Reversal Strategy shows the difference between no Ranking, and the same Strategy with ATS Ranking. ATS picks better trades, producing higher gains and lower draw downs! This kind of instant improvement can make a big difference for any trader.

Automatic Trade Selection

The Power of ATS

The above example uses the Double Stochastics Strategy on the S&P 100 and Nasdaq 100. Trades are ranked using the Volatility Price Ratio and Trend Intensity Index, with 10% of equity on each trade. Ranking enabled OmniTrader to select the best trades!

The Power of ATS

Before we developed ATS, we did not realize how much impact trade ranking could have on Strategy performance.

The Strategy on this page is just one example of this effect. The ONLY difference between the two curves is that one uses ranking to select trades. Looking at the stats to the right, we see that Average Annual ROI nearly doubled with a slight increase in Draw Down. This was achieved using exactly the same number of trades and the same percent invested!

The great thing is, all you do is turn it on. You don't have to write any formulas or tweak settings. ATS can improve most Strategies in the same way. What is this improvement worth to your trading? It's included in the OmniTrader 2018 upgrade!

Statistic	Standard	Using ATS
Net Profit	\$72k	\$146k
Avg. Ann. ROI	9.7%	17.1%
Avg. Ann. Draw Down	3.8%	4.1%
Calmar Ratio	1.88	2.40
Number of Trades	1075	1075
Average % Invested	37.5%	38.4%
Hit Rate	68%	73%
Profit Trade	0.41%	0.64%

Dramatically Improves ALL Strategies

How it Works

ATS Methods are defined in the Portfolio Simulator, each with its own ranking functions. When the Portfolio Simulator runs an ATS Method, it determines weights that indicate how much the given ranking formula helps predict better Signals. This provides excellent feedback, because we can focus on ranking functions that actually are predictive.

1 – ATS Method

We provide two Ranking Methods. You can also easily create and test your own.

2 - Simulation

The Portfolio Simulator will test the Ranking formulas and determine optimal weights to select the best trades in your profile. The process is 100% automatic.

3 - Trading

Focus List shows ranked Symbols.

AutoTrade will automatically select trades based on the ranking order.

Now you're trading with the BEST trades from your Strategies!

Introducing: iZones

The OmniTrader 2018 upgrade package comes with a powerful new concept called iZones, which are designed to identify supply and demand areas in charts.

iZones are similar to support your resistance levels. However, iZones are much more powerful because they are based on the strength of a reversal and price activity around a reversal.

A Major Market Force

All movement in the markets is based on supply and demand. An imbalance between the two causes markets to rise and fall. However, when an abnormal imbalance exists, we know that institutional forces are contributing, and they are likely to engage around the same price area in the future.

iZones identifies these important areas by examining price activity around a reversal. By analyzing how price reacts before and after a reversal, we are able to know the price area where market movers are looking to engage.

Supply and Demand Zones

iZones identify both Supply and Demand Zones. The charts to the right show examples of both. Once an iZone is detected, we look for it to provide support or resistance in the near future.

The charts on these pages show how iZones illuminate powerful reversal potential.

iZones can help us confirm trades in any market or timeframe. They can also be used as trading targets to help us maximize gains.

iZones identify where market makers create an abnormal imbalance of supply and demand.

iZones can be used in any market or timeframe to find pinpoint entries or optimal trading targets.

...the Zones where Profits are Made!

“Freshness” Matters For Profitable Trades

Supply and Demand Zones are dynamic. iZones will track the current zones in order to watch for them to be tested. However, as the supply and demand of the market changes, new Supply and Demand Zones are formed.

When this happens, iZones will stop tracking the previous zones and plot the new zones. This provides a dynamic indicator that automatically adjusts to current market forces.

iZone Trading Success

How can we use iZones in trading? The visual cues provided by this amazing indicator can be extremely helpful in confirming any trade from any strategy. The examples on this page show where iZone reversals are occurring.

It is absolutely uncanny how often these moves occur and how well they work. While iZones are valuable as a visual confirming indicator, we are also providing four Trading Strategies based on iZone logic – see the next page!

**Get
“In the Zone”
- with iZones!**

Fresh Demand Zones adjust as demand changes over time.

This Real Time chart for ADBE shows dynamic iZones in action.

Included: iZone Strategies

The iZones package includes a wealth of trading tools, including four trading strategies that help find great reversal trades in both End of Day and Real Time.

The iZones EOD Strategies

End of Day traders will love the trades generated by the iZones EOD Strategies. These strategies look for trades once a strong iZone is detected.

The chart for Priceline shows two incredible iZone trades. Both trades show a strong reaction when the Demand Zone is tested, leading to large gains.

The iZones RT Strategy

Real Time traders are going to be ecstatic to add iZones to their trading arsenal. The iZones RT Strategy finds both long and short trades in lower intraday timeframes.

The example of O'Reilly on the right shows a series of profitable trades in the span of three days. Note the strong moves that occur due to the Supply and Demand Zones being tested.

More Power Tools

The iZones package also includes the following tools to help you profit in any market or timeframe:

- 2 iZone Indicators
- 4 iZone Systems
- 2 iZone Trade Plans
- The iZone EOD Profile
- The iZone Chart Template

The package also includes *The Profit Magic of iZones* seminar to show how to use each of these components for iZone trading success! (See page 10).

Big Profits in End of Day Trading

The iZones EOD Strategy and Trade Plan finds medium to long term trades that can provide outstanding returns.

Consistent Gains in Real Time

The iZones RT Strategy generates profits with both short and long trades. (Note: The iZones are not shown on this chart)

NEW! Focus List Columns

We've added some important new columns to the focus list as a result of ATS and other features customers have requested.

ATS (Rank): Ranking values for Automatic Trade Selection are displayed in this column for easy sorting of opportunities, with best at the top.

OmniScript Indicator Columns: You can now create a column with any indicator formula you like, similar to Quick Indicators in charts.

Profit/Loss Column: For any position, you will now see Profit and Loss % right in the Focus List.

Enabled	Strategy	Time	Mech	Notes
<input checked="" type="checkbox"/>	Reversal (Stocks)	ALL	Mech	Basic Reversal strategy, with a Trend Inter
<input type="checkbox"/>	Breakout (Stocks)	ALL	Mech	Basic Breakout strategy.
<input type="checkbox"/>	Filter by Indicator	ALL	Mech	A strategy that fires on an indicator.
<input type="checkbox"/>	My Custom Strategy	ALL	Mech	This is my favorite strategy.
<input type="checkbox"/>	One System Strategy	ALL	Mech	A strategy that fires on a system.

Strategy Notes: It's easy to forget edits you've made to Strategies. Now, you can add Notes. The first line is displayed in the Strategies tab of the ToDo List.

Indicator Alerts: Want OmniTrader to tell you when your stock crosses an SMA? Now you can define alerts using indicators. Alerts can be applied to any individual Symbol or the entire Focus List.

Alert configuration for INTC:

- Symbol: INTC
- Indicator: [Dropdown]
- Item: [Dropdown]
- Frequency: DAILY
- Indicator Alert:
 - Long Condition: C > SMA(55) [Formula]
 - Short Condition: [Formula]
- Signal Alert Direction:
 - Both
 - Long
 - Short
- Action(s) to Take:
 - Play Sound: Alert Target.wav
 - Show Message Box with Symbol
 - Show Alert List
- Time Zone: Day GTC

Dynamic Chart Periods: Set your mouse wheel to change periodicity in any chart. Helps with multiple-timeframe confirmation.

Focus List Export: At last! Export an Excel-readable (text) file from the columns in your Focus List!

SPECIAL SEMINAR:

The Profit Magic of iZones

Everything You Need to Realize iZones Trading Success

The iZones plug-in delivers a wealth of powerful trading tools, and in *The Profit Magic of iZones* we will teach you how to use them all. Jeff Drake,

the head developer of iZones, takes you through a comprehensive tour of the plug-in and shows you how you can apply iZones to your trading.

The seminar begins with a discussion on the growing popularity of Supply and Demand Zones, which are the bedrock concept behind iZones. We then look at how Nirvana Systems has expanded upon this concept in order to provide these zones for any market or timeframe.

The seminar then explores the components of the iZones plug-in. We spend significant time showing you how iZones are built and how they can be adjusted to your trading.

Learn How to Make Money with iZones!

The Profit Magic of iZones will explain every part of the plug-in, and show you how to successfully apply it to your trading.

We wrap up the seminar by looking at actual trading with iZones. Jeff shows you how to confirm entries and exits with the zones, and also how to use the provided Trading Strategies in order to find great iZones trades.

The Profit Magic of iZones makes sure that you are armed with the information you need to apply iZones to your trading, and use the tools provided to realize trading success in 2018!

The Profit Magic of iZones Seminar Agenda

- The Concept Behind iZones
- Why Price Consistently Reacts to iZones
- How an iZones is Detected
- How to Plot iZones in Any Timeframe
- Why “Fresh” iZones are Money Makers
- How to Use iZones for Entry Confirmation
- Maximizing Profits with iZones
- Exploring the iZones Profile
- Using the iZones Chart Template
- How to Trade with the iZones Strategies
- Creating Your Own iZones

Included FREE when you purchase the
OmniTrader 2018 Upgrade Package by December 8th!

OmniTrader 2018

Order by December 8th and Save!

“Automatic Trade Selection is the most powerful feature we’ve ever included in an OmniTrader upgrade. By ranking trades using specific indicators, we are seeing **DOUBLE** the profitability in our Strategies. All you do is activate it, and let it go to work!

Then use the new iZones to identify trades with explosive move potential! iZones are a powerful new concept that Jeff Drake illuminates in his *Profit Magic of iZones* seminar. This upgrade is definitely going to improve your trading in 2018. I guarantee it!” – Ed Downs

OmniTrader 2018 Upgrade **\$149** Reg. \$199

- **Automatic Trade Selection (ATS) with two Powerful Ranking Methods**
- Edit Strategy Notes and Descriptions
- ATS Ranking Column
- Alerts on Indicators
- Gain/Loss% Column
- Dynamic Chart Periods
- OmniScript Indicator Columns
- Focus List Export

iZone Plug-In with *The Profit Magic of iZones* Seminar..... **\$349** Reg. \$495

Find and trade the most important Supply and Demand Zones.
The iZones Plug-In includes a number of great resources:

- **4 Powerful iZone Strategies**
- 2 iZone Indicators
- 4 iZone Systems
- 2 iZone Trade Plans
- The iZone EOD Profile
- The iZone Chart Template

INCLUDED: *The Profit Magic of iZones* Seminar

**Special Package
Price \$395**

Includes OmniTrader 2018
PLUS the NEW iZones Plug-In

Offer Ends December 8th
