# The POWER of Multiple Timeframe Confirmation Now in CPRM 6

# 6

## The Most Powerful Chart Pattern Technology in the World is Now Better than Ever!

The Chart Pattern Recognition Module (CPRM) automatically finds the stocks with the strongest patterns in the market. **Now in CPRM6, we can also find the best patterns in ANY timeframe! This breakthrough in pattern identification technology makes the best Chart Pattern Module more powerful than ever before!**

When CPRM6 is activated in your OmniTrader or VisualTrader, the software will find the historical and current patterns for the symbols being analyzed. This helps us find the best setups based on the current timeframe analysis.

But now, you can also have any other periodicity analyzed. Simply activate another timeframe to be analyzed and add the pattern columns for that periodicity. You can also use one of the pre-configured MTC Profiles we provide to easily find the highest confirmed trades in the market (see next page).

## Get MTC Patterns in Higher AND Lower Timeframes

CPRM6 provides the flexibility of getting pattern confirmation in either higher timeframes or lower timeframes – or BOTH! Whether you enable a higher timeframe or a lower timeframe, CPRM6 will analyze all of the enabled timeframes in your profile and show you any recent patterns. This unique ability to span multiple timeframes for Chart Patterns creates an unprecedented edge for CPRM6 owners!

The Daily chart for APH shows a Short Signal and it is confirmed with a CPRM6 Trend Line Break. But we want more confirmation that this stock is primed to fall.

The Weekly chart for APH also shows a downward move confirmation with a Trend Line Bounce that would be almost impossible to see in the Daily chart.

The combination of the Daily AND the Weekly confirmation helps us identify a stock that is poised to MOVE! **CPRM6 makes it easy to find trades like this on a consistent basis.**

# The Most Highly Confirmed Candidates at Your Fingertips!

## The CPRM6 End-of-Day Profile

CPRM6 includes two pre-configured Profiles to help you find the most highly confirmed candidates in the market.

The CPRM6 EOD Profile looks at two different timeframes when you run your analysis. First, it looks at the Daily timeframe to identify the stocks with strong recent Chart Patterns and determines the likely direction of a move.

The Profile also provides an even higher level of confirmation by also analyzing the Weekly charts for each symbol. Any recent higher timeframe patterns that are detected are displayed in the Focus List, making it easy to see which symbols have the highest level of pattern confirmation.

**The CPRM6 EOD Profile is very easy to use. Just activate your favorite Strategies and let 'er rip! It's never been easier to see which signals from your Strategies have the highest probability of success!**

## See the Market in ANY Timeframe

CPRM6 lets you see the pattern analysis for any timeframe.

When you enable a timeframe for analysis, you can see the most recently identified pattern, whether it is bullish or bearish, how long ago the pattern was identified and more.

Column	Description
)Pat	DAILY Pattern Short Name
)PBars	DAILY Bars since last pattern
)PD	DAILY Pattern Direction
)PName	DAILY Pattern Name
)	DAILY signals
)Str	DAILY Pattern Strength
0 MPat	30 MINUTES Pattern Short Name
0 MPBars	30 MINUTES Bars since last pattern
0 MPD	30 MINUTES Pattern Direction
0 MPName	30 MINUTES Pattern Name
0 M	30 MINUTES signals
0 MStr	30 MINUTES Pattern Strength
WPat	WEEKLY Pattern Short Name
WPBars	WEEKLY Bars since last pattern
WPD	WEEKLY Pattern Direction
WPNName	WEEKLY Pattern Name
W	WEEKLY signals
WStr	WEEKLY Pattern Strength

CPRM6 allows you to choose from the pattern information you want to see for each timeframe. And you can choose from both lower timeframes and higher timeframes.

## An All New Level of Pattern Confirmation

The CPRM6 EOD Profile looks at the Daily chart and the Weekly chart in order determine which trades have the highest profit potential.

The image to the right shows the CPRM6 EOD Profile Interface. We can easily see the Daily Pattern information on the left and the Weekly Pattern information on the right. Finding patterns in the same direction, like we see on FLR, gives us an incredibly highly confirmed trade.

Symbol	Sig	Strategy	Daily Pattern Information			Weekly Pattern Information		
			DPD	DPName	DStr	WPD	WPNName	WStr
LRCX	▲	Trending (Stocks)	●	Trend Line Break(3)	2			0
UHS	▲	Reversal (Stocks)	●	Trend Line Reversal(E	3	●	Trend Line Reversal(5+	1
GME	▲	Reversal (Stocks)	●	Trend Line Break(2)	1	●	Support Break(1)	1
UPS	▼	Breakout (Stocks) (+	●	Trend Line Break(5+)	5			0
OI	▼	Trending (Stocks)	●	Support Break(1)	1			0
IR	▼	Breakout (Stocks)	●	Trend Line Reversal(E	1			0
FLR	▼	Breakout (Stocks)	●	Trend Line Break(3)	5	●	Trend Line Reversal(5+	3
UTX	▼	Breakout (Stocks)			0	●	38 % Retracement	1
APD	▼	Trending (Stocks)	●	Trend Line Break(4)	4	●	Trend Line Reversal(4)	1
ETN	▼	Breakout (Stocks)	●	Trend Line Break(2)	4			0
MU	▼	Breakout (Stocks)	●	Trend Line Break(5+)	1			0
FLS	▼	Breakout (Stocks)	●	Trend Line Break(3)	3	●	Trend Line Reversal(5+	1
VIAB	▲	Reversal (Stocks)	●	Support Break(1)	3	●	Trend Line Reversal(5+	1
DLTR	▲	Breakout (Stocks)	●	Trend Line Break(3)	3	●	Trend Line Reversal(5+	1
NWI	▲	Reversal (Stocks)	●	Trend Line Reversal	4	●	Pattern Break(1)	4

# Unprecedented Real Time Trading Power

## The CPRM6 Real Time Profile

This exciting new version of the Chart Pattern Recognition Module also includes a pre-configured Real Time Profile for multiple timeframe analysis.

The CPRM6 RT Profile is designed to be run on the 5-minute timeframe. When done so, it will identify patterns for all of the symbols in your Focus List in that timeframe. And it will also look for any recent patterns in the 60-minute timeframe.

This makes it easy to instantly see not only the most highly confirmed Real Time trades, but it will also keep you from trading into a strong higher timeframe pattern that could hinder your trade.

MTC Patterns give Real Time traders incredible trading firepower, and is only available in CPRM6!

## Confirming the Best Intraday Trades

C	Symbol	Sig	Strategy	5 MPD	5 MPat	5 MPBars	5 MStr	60 MPD	60 MPat	60 MPBars	60 MStr
	AIG	↑	RTReversal	●	TLN	9	3	●	TLN	6	5

The Focus List row at the top shows a bullish 5 minute Trendline pattern being confirmed by a bullish 60 minute Trendline pattern. This added level of confirmation helps to take the trade with confidence, and capture an easy profit on AIG.

## Boosting Profits with MTC Chart Patterns

### Seminar

While the new features in CPRM6 are intuitive and easy to engage, we want to make sure that you have all of the information you need to profit ASAP. So your purchase of CPRM6 includes our new seminar, *Boosting Profits with MTC Chart Patterns*.

This seminar will discuss how you would approach confirming trades using multiple timeframe Chart Patterns. We show which patterns are helpful in lower and higher timeframes, and how to configure OmniTrader in order to use the MTC Patterns to find the hottest prospects in the market.

We will also explore the CPRM6 MTC Profiles. We will show you how easy it is to put these profiles into action, and also how you can customize these profiles to find the exact setup you are looking for.

***Boosting Profits with MTC Chart Patterns*** gives you the information you need to make consistent gains with CPRM6, and it is included FREE with your purchase of CPRM6.
