

OmniFunds **NEWS** *March 2019*

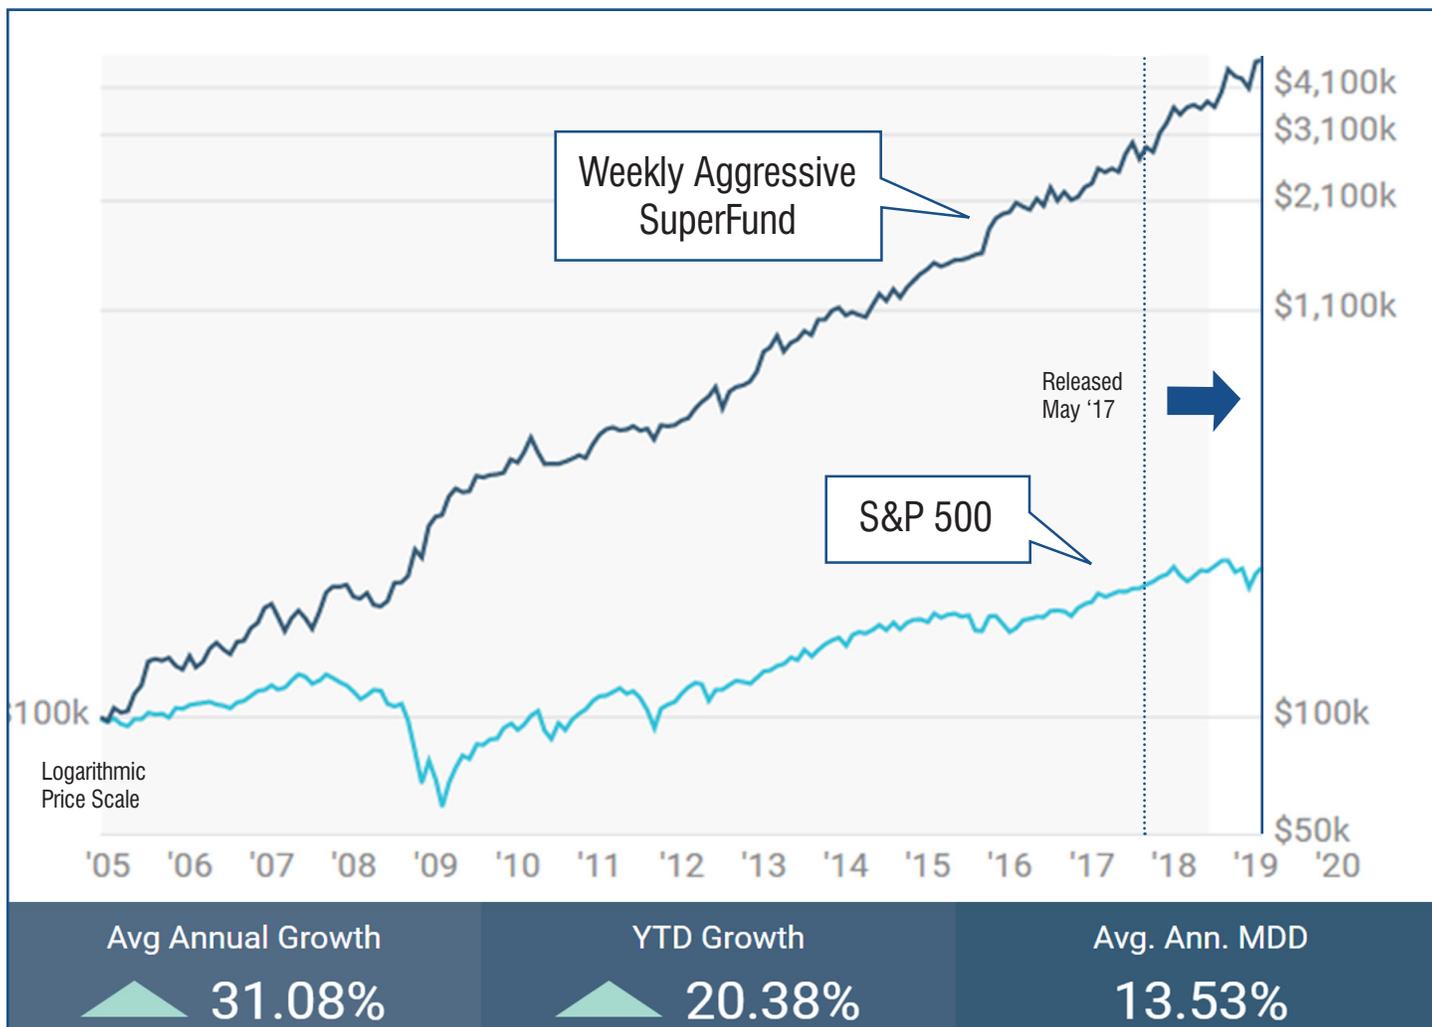

IN THIS ISSUE:

- 2** Leading SuperFund up 23% in 2018
- 3** Why OmniFunds?
- 4** SuperFunds for Every Objective
- 6** Strong Performance in 2019
- 7** 20 Seats Just Opened!

Weekly Aggressive SuperFund Gains 23% in 2018

Up 20% so far this year!

OmniFunds was built to out-perform the competition. The advantage OmniFunds has over other investment approaches, including the Robo Advisors, is that each fund periodically “switches” into new equities that are poised to go up in the next timeframe.

Our leading SuperFund is Weekly Aggressive, shown above. This Pro OmniFund switches between equities on a weekly basis, depending on the strength and weakness of a select list of stocks.

This OmniFund generated a 23% return in 2018 while the market was down 6.6% in the same time period. That’s nearly a 30% spread in performance – in a year where the Robo Advisors lost 8% for their clients.

We now have five “Pro” OmniFunds (also called “SuperFunds”) – ALL OF WHICH ARE BEATING THE MARKET SO FAR THIS YEAR, and once again, beating the Robo Advisors. After nearly two years of operation, we have consistent proof that the OmniFunds concept is a winner!

So far in 2019, Weekly Aggressive is up 20% compared to 11% for the market. Let’s explore how this powerful platform can consistently achieve these high gains...

A Better Investment Solution

Most investment platforms place assets into ETFs, with the idea that in the long term, the specific mix will appreciate. Unfortunately, this is not always the case! We know that large draw downs and losses can come from being in the wrong investments at the wrong time.

OmniFunds generates superior returns, with less risk, by applying THREE KEY concepts.

Market State Sets the Stage

The first step in the process is assessing Market States. In 30 years of trading experience, we have learned that it is best not to trade the same stocks or ETFs in all market conditions. If the market is steadily trending up, a classic Stock/Bond mix will work fine.

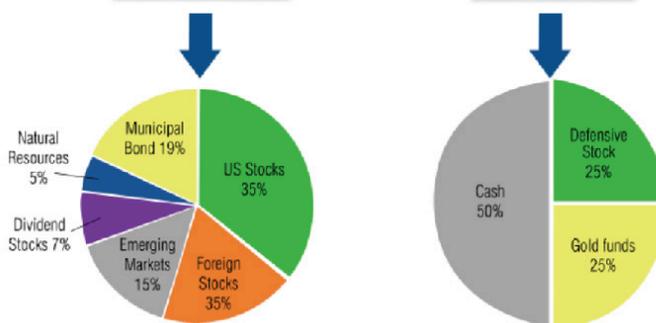

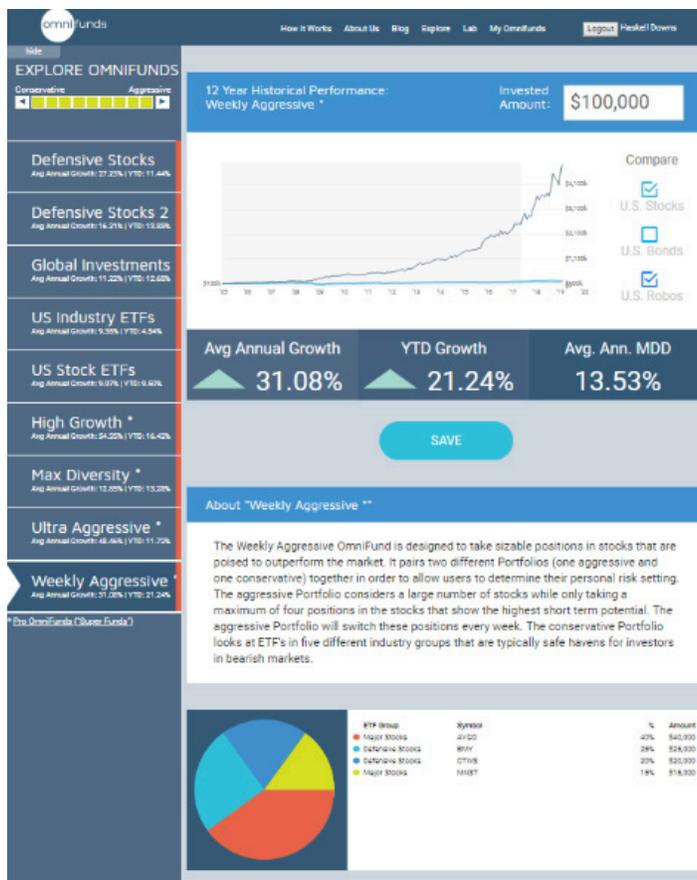

But if the market breaks key support or becomes extremely volatile, we want to take a defensive posture, even going to cash. So, in OmniFunds, we detect these changes in the market and adjust the target symbol lists accordingly, as shown in the diagram to the right.

Filters Help Avoid Losses

There are times when, even in a trending market, we want to avoid certain symbols. They may simply be too volatile, or may be under selling pressure for some fundamental reason. Simply avoiding stocks or ETFs that are unlikely to appreciate can be a very good thing for our accounts.

The Selection Process

The true power of OmniFunds becomes clear in the selection process. Given a list of ETFs in (say) the Bond category, we can use special indicators to rank the symbols to select those that are the most likely to appreciate.

Switching Assets based on Market State

Stellar Performance

OmniFunds Pro was designed to develop SuperFunds that withstand difficult markets and outperform in bullish markets. Recent performance shows that they have accomplished that goal with flying colors!

2018 proved to be an extremely difficult market, but our SuperFunds were able to not only avoid the losses of the broad market, but they were able to post exceptional returns.

In 2019, the market has been extremely bullish so far, but our SuperFunds have not only been able to keep up, they are outperforming the market significantly.

These incredible SuperFunds were developed in our OmniFunds Lab, which is available for OmniFunds Pro owners to create their own personal SuperFunds.

A SuperFund for Every Objective

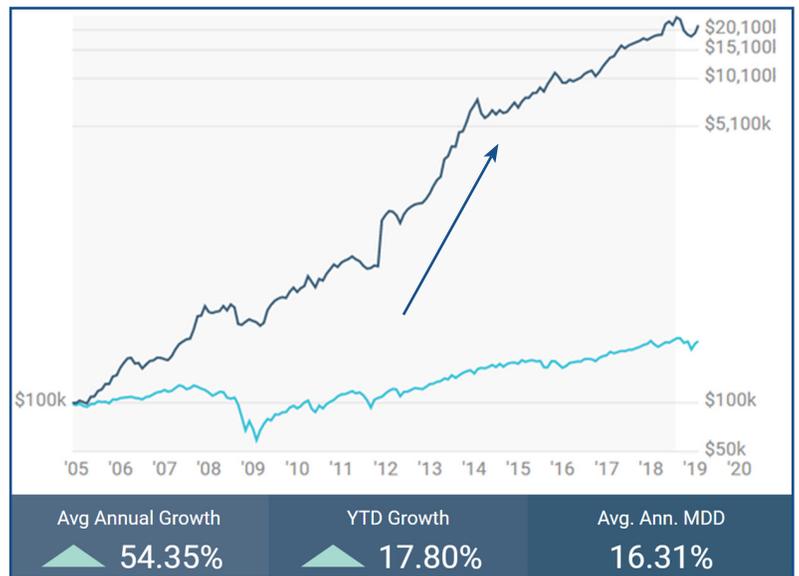

Weekly Aggressive, featured on page 2, is based on weekly switching, and shows the highest growth so far in 2019.

High Growth, shown to the right, has averaged an incredible 54% since 2005 and is also dramatically ahead of the market.

Defensive Stocks switches into stocks that typically go up in market corrections, and it has continually excelled in bearish conditions..

Ultra Aggressive trades the market aggressively by switching every two days. It's also beating the market in 2019 and has shown a strong 48% average gain since 2005.

Finally, **Max Diversity** (not shown) was designed to diversify across multiple market segments, making it a strong performer with exceptional risk control.

High Growth – Exceptionally high average annual growth

Defensive Stocks – A SuperFund that excels in difficult markets

Ultra Aggressive – High Returns through aggressive switching

SuperFunds

continued from page 4...

2018 was one of the most difficult markets that we have seen in years. The S&P 500 Index was down -6.59% for the year, and most Robo Advisors were down more than that.

Wouldn't it be better to actually MAKE money in a down market? If you had been in our SuperFunds, you would have! All our SuperFunds beat the market in 2018, with Weekly Aggressive leading the way with an amazing 23% gain!

2019 has seen a strong bullish recovery from the drastic selloff at the end of 2018. While an 11% market return is impressive, what's even MORE impressive is the fact that every one of our Super Funds is outperforming it!

SuperFund Performance so far in 2019

| SuperFund | Year to Date Performance |
|-------------------|--------------------------|
| Weekly Aggressive | 20% |
| High Growth | 17% |
| Max Diversity | 15% |
| Ultra Aggressive | 12% |
| Defensive Stocks | 12% |

ALL our OmniFunds "Pro" SuperFunds are beating the market so far in 2019. In addition, each SuperFund...

- Has dramatically outperformed the market since 2005.
- Avoided the Market Crash of 2008
- Is Near Equity Highs.

Intelligent Fund Management, LLC just secured SEC Approval to launch our Asset-Under-Management version of OmniFunds, which will be called iOmniFunds.

20 Seats Just Opened!

We just opened 20 "Pro" seats to help fuel the final preparations for launch. This is your chance to get in on the ground floor and benefit for years to come!

Our SuperFunds will be available in iOmniFunds for a 2% AUM Fee. However, those who purchase OmniFunds "Pro" ahead of the iOmniFunds launch will be able to continue to use them in the current MyOmniFunds platform with no fees charged – ever.

That's a savings of 2% per year!

Don't Miss this Opportunity to "Go Pro" and Gain Access to Our SuperFunds with ZERO FEES.

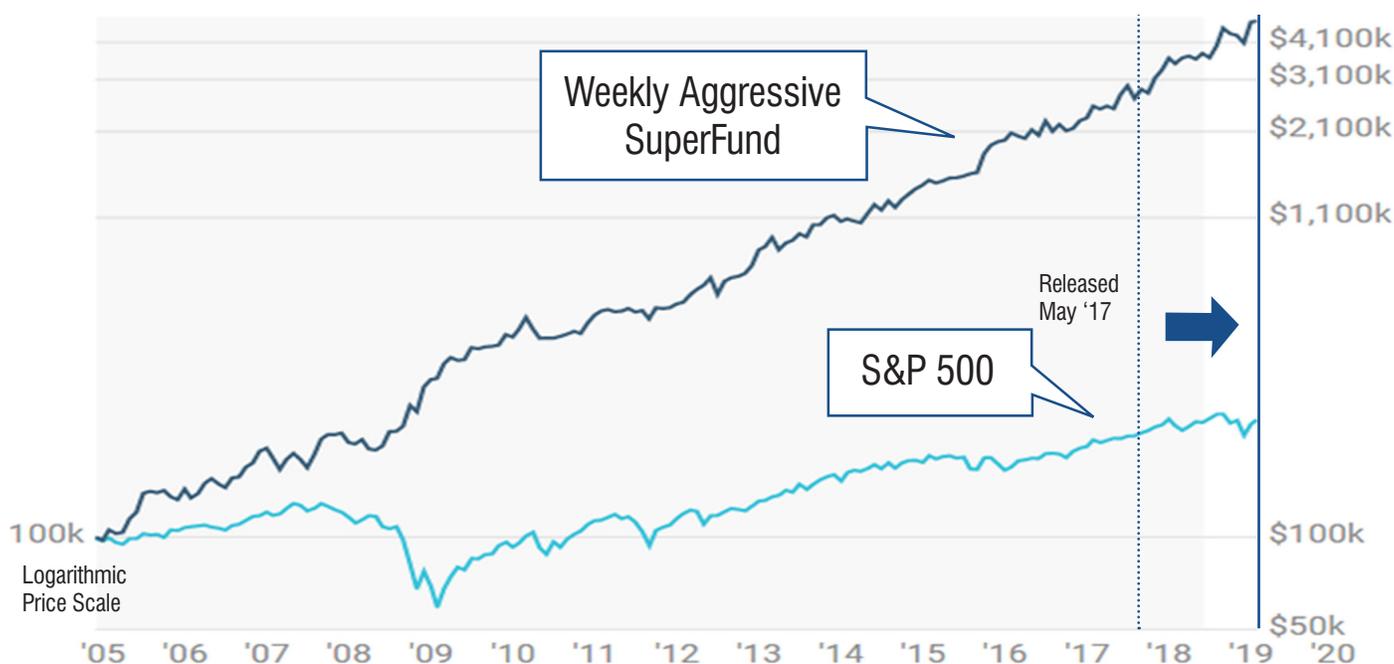

"IFM has engaged Nirvana Systems to develop, register, and deploy OmniFunds as a new 'Robo Advisor'. Once launched, IFM will begin charging Assets Under Management fees. The good news is, we just opened 20 OmniFunds Pro seats. **This is your chance to gain unlimited future access to our 'SuperFunds' prior to launch.** Now is the time to get on board!" – Ed Downs

OmniFunds Lab - Reg \$2,995. **Special Offer: Now just \$1,495**

The OmniFunds lab lets you fully customize an OmniFund. Select from our pre-defined Aggressive and Conservative Portfolios. Or, create your own with your Symbols and Market States (from our Library). It's the best way to trade what you want to trade, how you want to trade it. The OmniFunds Lab comes with a 90 day Money Back Guarantee.

OmniFunds "Pro" SuperFunds - Reg \$5,000. **Special Offer: Now just \$3,500**

Enjoy access to ALL SuperFunds featured in this mailer! When launched in our AUM model, these funds will be available at a charge of 2.0% of Assets Under Management in iOmniFunds. But as a Pro owner, you can continue to use them in MyOmniFunds with zero fees. OmniFunds Pro licensees also get the Lab free. We are limiting access in this release to 20 new OmniFunds Pro Users. This is the chance of a lifetime to secure your seat before launch AND - you can use any SuperFund now, while we prepare for launch.
